BAG

Say goodbye to your collection of reusable bags in different shapes and sizes. Our footprint bag is a stylish and distinctive multi-pack of shopping bags which makes re-using simple.

Research has shown that consumers want to use less disposable carrier bags and in turn help the environment. However until now, the only options were bulky reusable bags which cluttered cupboards, or single bags in pouches - never quite enough! A handy **multi-pack** was missing.

The market is swamped by single reusable bags but for the first time high quality and convenience combine to make the perfect shopping product. Each of our shopping bags are made out of one loop of tough parachute material with a faked bottom hem. This means they are incredibly strong but will fold up very small and are guaranteed to last.

Plastic bags are a global issue and our packs have already generated interest and sales beyond the UK in Europe, America and Australia.

We have designed a Footprint bag for all shoppers – from food to general, singles to families and for daily or weekly shops:

The **8-pack** has eight tough and stylish reusable shopping bags in one compact pack which hooks neatly onto a supermarket trolley. There is even a trolley coin attached to make life simple!

The **6-pack** is coming soon.

The **4-pack** contains two shopping bags and two gorgeous shoulder bags. This is intended more for daily food and general shopping. It fits easily into most handbags so you never need to be caught out again!
